## **5 Micron Sediment Filter**

This filter catches anything that is 5 microns and bigger prolonging the life of the GAC filter.

**Granular Activated Carbon Filter** reduces all the **Chlorine** that makes the water smell.

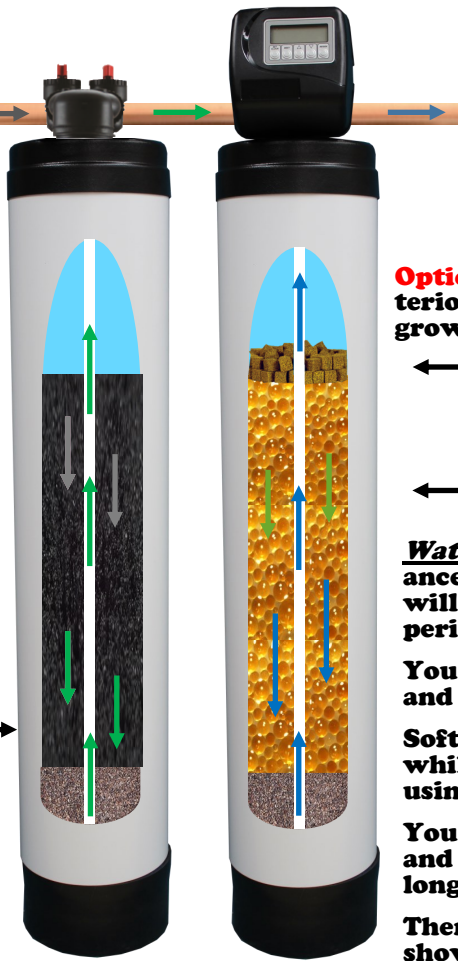

1 cubic foot has the ability to remove 1 part per million of chlorine from a million gallons of water.

A GAC filter also can remove the alphabet soup of contaminants you see on the news on a regular basis such as:

- **TCE**
- **PCB**
- **Benzene**
- **Pesticides**
- **Herbicides**
- **Insecticides**

Carbon is one of the most porous materials on Earth. It has a surface area of 1,050 square meters per gram.

(456 grams in a pound, 27 lbs. per cubic foot, over 107 football fields per/cubic foot).

**Optional:** Special Cubes add a Bacteriostatic to keep down Bacteria growth in the bed.

**Water Softener** is the only appliance you can put in your house that will totally pay for itself in a short period of time.

You can expect spot-free dishes, soft and clean laundry.

Soft and wonderful hair and skin all while using half the soap you are using now.

You will be able to use less shampoo and your bar soap will last a lot longer.

There will be no residue left in your shower.

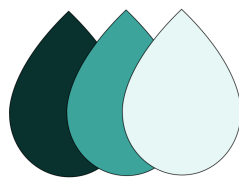

No scale build-up on your faucets or sinks.

Your water using appliances will last longer.

Digital display for easy programming.

Low electrical use (about \$2.00/year).

Metered control makes unit more efficient.
